

The following persistent herbicides have rotation restrictions of 12 months or more. Therefore, if any of these herbicides have been used within the kit planting area in the past year, it is likely to impact the establishment and success of the plants. **If you have used a product with any of these active ingredients in the past year, please either cease their use in the kit planting area and reapply for a habitat kit next year, or choose a different planting site.** Please note that the example product names provided do not constitute a comprehensive list of all products containing that active ingredient. If you used a product which is not listed and you are unsure of the active ingredient(s), please refer to the product label to verify it is not included in the table below.
